**SOURCES.** The 1860 U.S. Census Slave Schedules for Baldwin County, Alabama (NARA microfilm series M653, Roll 27) reportedly includes a total of 3,714 slaves. This transcription includes 41 slaveholders who held 24 or more slaves in Baldwin County, accounting for 2,150 slaves, or about 58% of the County total. The rest of the slaves in the County were held by a total of 248 slaveholders, and those slaveholders have not been included here. Due to variable film quality, handwriting interpretation questions and inconsistent counting and page numbering methods used by the census enumerators, interested researchers should view the source film personally to verify or modify the information in this transcription for their own purposes. This transcription was made from the Ancestry on line images of the microfilm. Census data for 1860 was obtained from the Historical United States Census Data Browser, which is a very detailed, searchable and highly recommended database found at <http://fisher.lib.virginia.edu/census/> . Census data on African Americans in the 1870 census was obtained using Heritage Quest's CD "African-Americans in the 1870 U.S. Federal Census", available through Heritage Quest at <http://www.heritagequest.com/> .
