

ALABAMA MARINE RESOURCES DIVISION REEF FISH TAGGING PROJECT

If you catch a reef fish (snapper, grouper, triggerfish, porgy, grunt, jack, etc.) with a yellow **AL Marine Resources** tag located in the left "shoulder" of the fish, simply fill out as much information on this form as possible and contact an Alabama Marine Resources Division office. If you are releasing a fish with a tag, do not remove the tag, but continue to report. Photos of the fish are appreciated but not required.

You can report your fish by:

email: dcnr.swtags@dcnr.alabama.gov

phone: 251-968-6605

mailing: Reef Fish Tag Return

AL Marine Resources Division

P.O. Drawer 458

Gulf Shores, AL 36547

Forms can also be dropped off at either the Dauphin Island or Gulf Shores AMRD offices.

For more information visit www.outdooralabama.com/swtags.

Thank you for your assistance with this important research!

CATCH INFORMATION

Fish Species: _____

Tag Number: _____

Capture Date: _____
