

## Virtual Seminar: “Meeting MS4 Permit Requirements, Old & New”

Date: Thursday, Dec. 2, 2021

Time: 1:30 p.m. – 3:30 p.m. CST

Registration: Please register through the ASA Web site at [www.AlabamaStormwater.org/ASA-Seminar-01221](http://www.AlabamaStormwater.org/ASA-Seminar-01221).

\* No registration fee. Information on accessing the seminar will be e-mailed after you register.

Our next virtual seminar will be another important and timely one. **James (Jimbo) Carlson, PE**, and **Cammie Ashmore** of ADEM will be our speakers. Jimbo is ADEM’s Stormwater Management Branch Chief, and Cammie oversees the ADEM MS4 Program. During the seminar, Jimbo and Cammie will

- give an overview of the changes in the recently-reissued **MS4 Phase II General Permit** (NPDES No. ALR04000),
- highlight common MS4 **compliance issues** ADEM has observed, and
- discuss the new document submission approach through the **AEPACS** database that will be in place soon.

Therefore, the seminar will address issues impacting all types of MS4 (i.e., Phase I, Phase II, and non-traditional) in Alabama. Jimbo and Cammie will be available to answer our questions asked during the seminar and submitted before the seminar using the registration form (link provided above).

There are MS4 representatives who are not yet members of ASA, but they would likely be interested in this seminar and future ASA activities. If you know of such an MS4 representative, we welcome and encourage you to **forward this invitation** to them.

Please join us on Dec. 2 as we continue to promote robust connection among Alabama stormwater professionals. We will see you then!
