

# Why are you looking for Wildlife Management Area information? You should be fishing!

The 2026-2027 Alabama Wildlife Management Area (WMA) Permits and Maps are currently being updated by our wildlife biologists and mapping teams to reflect the latest season dates, zone adjustments, and regulations.

While we put the finishing touches on this year's public hunting grounds, don't let prime outdoor time slip away. Alabama's waters are calling.

## What to Do Right Now:

- **Grab a Rod:** Right now is peak season for hitting Alabama's world-class rivers, Gulf waters, or one of our 20 State Public Fishing Lakes. See bank fishing opportunities here.
- **Go Digital:** Download the Outdoor Alabama App to keep your current licenses handy, log your catches, and be the absolute first to know when the new WMA packages drop.
- **Stay Tuned:** The brand-new, updated 2026-2027 maps and free permits will be fully loaded and ready for download on OutdoorAlabama.com later this summer.

Visit [OutdoorAlabama.com](https://OutdoorAlabama.com) to check current fishing regulations or purchase your freshwater/saltwater licenses.
